Unit Test Plan - Holder Subsystem

Class to test:	Holder	
Test Case:	Method and Parameters	Expected Output
Booking successful	makeBooking(time, ID)	Booking confirmation
Booking unsuccessful	makeBooking(time, ID)	Error message
Check-In successful	areaCheckIn(location, time, passState)	Check-In confirmation
Check-In unsuccessful	areaCheckIn(location, time, passState)	Error message
Check-Out successful	areaCheckOut(location, time, passState)	Check-Out confirmation
Check-Out unsuccessful	areaCheckOut(location, time, passState)	Error message
Photo upload successful	uploadPhoto(photo)	Photo displayed in account
Photo upload unsuccessful	uploadPhoto(photo)	Error message
Details entered successful	enterDetails(name, age, dateOfBirth, gender, address, email, phoneNumber)	Confirmation message
Details entered unsuccessful	enterDetails(name, age, dateOfBirth, gender, address, email, phoneNumber)	Error message
Update details successful	updateDetails(name, age, dateOfBirth, gender, address, email, phoneNumber)	Confirmation message
Update details unsuccessful	updateDetails(name, age, dateOfBirth, gender, address, email, phoneNumber)	Error message

System Test Plan

Use case: Registration

Scenario 1: The required information is input but the optional fields are blank

Holder	System
1. Upload personal photo	
2. Input phone number (no input)	
3. Input email (no input)	
4. Input address (no input)	
5. Input name (no input)	
6. Input gender (no input)	
7. Input date of birth (not input)	
	8. Verify
	9. Create

<u>Test Data</u> Input: <ul style="list-style-type: none">- Photo: picture of user- Personal details: blank Stored data: On Cloud: <ul style="list-style-type: none">- Registered account- User info Output: <ul style="list-style-type: none">- Crownpass account- Photo of user	<u>Test Process</u> Set up test context: <ul style="list-style-type: none">- App: Personal details are blank- Database: - Upload Photo Expected output: "photo found" Check: if output matches the expected Enter details Expected output: No output Check: if output matches the expected Verify Expected output: Form submitted Check: If form was submitted
---	---

Scenario 2: The required information is input but the optional fields are blank and verification has failed

Holder	System
10. Upload personal photo	
11. Input phone number (no input)	
12. Input email (no input)	
13. Input address (no input)	
14. Input name (no input)	
15. Input gender (no input)	
16. Input date of birth (not input)	
	17. Verify (failed)
	18. Create

<p><u>Test Data</u></p> <p>Input:</p> <ul style="list-style-type: none"> - Photo: picture of user - Personal details: blank <p>Stored data:</p> <p>On Cloud:</p> <ul style="list-style-type: none"> - Registered account - User info <p>Output:</p> <ul style="list-style-type: none"> - Error Message 	<p><u>Test Process</u></p> <p>Set up test context:</p> <ul style="list-style-type: none"> - App: Personal details are blank and verification failed - Database: - <p>Upload Photo</p> <p>Expected output: "photo found"</p> <p>Check: if output matches the expected</p> <p>Enter details</p> <p>Expected output: No output</p> <p>Check: if output matches the expected</p> <p>Verify</p> <p>Expected output: Form not submitted</p> <p>Check: If form was rejected</p>
--	---

Scenario: The required information is input and only some of the optional fields are filled

Holder	System
1. Upload personal photo	
2. Input phone number	
3. Input email (no input)	
4. Input address	
5. Input name (no input)	
6. Input gender (no input)	
7. Input date of birth (not input)	
	8. Verify
	9. Create
